ACTA METALLURGICA ET MATERIALIA

CONTENTS AND AUTHOR INDEX
VOLUME 40
1992

Board of Directors

Professor Gareth Thomas
Dr William W. Scott Jr
Professor Mats Hillert
Professor William W. Gerberich
Professor P. Haasen
Professor Robert C. Gifkins
Robert B. Wood

Dr Robert Fullman, *Secretary–Treasurer*

Professor Bernard H. Kear, *Chairman*

Editor

Professor Michael F. Ashby, University of Cambridge, University Engineering Laboratories, Trumpington Street, Cambridge CB2 1PZ, England

Deputy Editor

Professor L. M. Brown

Assistant to the Editor

Mrs Irene Kightley

Associate Editors

Professor Carlos A. Pampillo (*Argentina*)
Professor I. Polmear (*Australia*)
Professor B. Lux (*Austria*)
Professor D. L. Delaey (*Belgium*)
Professor M. A. Mannheimer (*Brazil*)
Professor W. Tyson (*Canada*)
Professor J.-m Xiao (*China*)
Professor V. Lindroos (*Finland*)
Professor L. P. Kubin (*France*)
Profesor P. Haasen (*Germany*)
Professor S. Ranganathan (*India*)
Professor David G. Brandon (*Israel*)
Dr M. Vittori (*Italy*)
Professor T. Mori (*Japan*)
Professor N. J. Kim (*Korea*)
Professor M. J. Yacaman (*Mexico*)
Professor J. T. M. De Hosson (*The Netherlands*)
Professor V. L. Indenbom (*Russia*)
Professor F. R. N. Nabarro (*South Africa*)
Professor Mats Hillert (*Sweden*)
Professor John P. Hirth (*U.S.A.*)

ACTA METALLURGICA ET MATERIALIA
CONTENTS OF VOLUME 40

NUMBER 1

T. M. Pollock and A. S. Argon	1	Overview No. 95: Creep resistance of CMSX-3 nickel base superalloy single crystals
J. M. Duva and P. D. Crow	31	The densification of powders by power-law creep during hot isostatic pressing
S. Suriñach, M. D. Baro, J. A. Diego, N. Clavaguera and M. T. Clavaguera-Mora	37	A new temperature versus heating rate transformation (T–HR–T) diagram: application to study the crystallization behaviour of $Fe_{67.5}Co_{15}Nb_{1.5}B_{16}$ metallic glass
A. D. Rollett, M. J. Luton and D. J. Srolovitz	43	Microstructural simulation of dynamic recrystallization
A. Choudhury, C. L. White and C. R. Brooks	57	The intergranular segregation of boron in Ni_3Al: equilibrium segregation and segregation kinetics
B. N. Cox and C. S. Lo	69	Load ratio, notch, and scale effects for bridged cracks in fibrous composites
H. Kung, D. R. Rasmussen and S. L. Sass	81	Grain boundaries in Ni_3AL—I. The local compositional order
H. Kung and S. L. Sass	99	Grain boundaries in Ni_3Al—II. The dislocation structure of small angle boundaries
Kwang-Ryeol Lee and Duk N. Yoon	107	Chemically-induced liquid film migration with low lattice diffusivity relative to the migration rate in Mo–Ni–(W)
I. J. Ford	113	Intergranular fracture of fast reactor irradiated stainless steel
A. G. Every, Y. Tzou, D. P. H. Hasselman and R. Raj	123	The effect of particle size on the thermal conductivity of ZnS/diamond composites
M. C. Watson and T. W. Clyne	131	The use of single fibre pushout testing to explore interfacial mechanics in SiC monofilament-reinforced Ti—I. A photoelastic study of the test
M. C. Watson and T. W. Clyne	141	The use of single fibre pushout testing to explore interfacial mechanics in SiC monofilament-reinforced Ti—II. Application of the test to composite material
M. S. Duesbery, N. P. Louat and K. Sadananda	149	The mechanics and energetics of cross-slip

S. Meagher, R. S. Borch, J. Groza, A. K. Mukherjee and H. W. Green II	159	Activation parameters of high-temperature creep in polycrystalline nickel at ambient and high pressures
M. H. Oh, H. Inui, A. Nakamura and M. Yamaguchi	167	Recovery and recrystallization of cold-rolled polysynthetically twinned (PST) crystals of TiAl
S. M. Pickard, E. Manor, H. Ni, A. G. Evans and R. Mehrabian	177	The mechanical properties of ceramic composites produced by melt oxidation
Seong-Jai Cho, Hahngue Moon, B. J. Hockey and S. M. Hsu	185	The transition from mild to severe wear in alumina during sliding
K. J. Bowman and R. Gibala	193	Stress asymmetry in cyclic deformation of b.c.c. metals
C. Ko and R. B. McLellan	201	Thermodynamics of Co–B–H ternary solid solutions

NUMBER 2

B. Bay, N. Hansen, D. A. Hughes and D. Kuhlmann-Wilsdorf	205	Overview No. 96: Evolution of f.c.c. deformation structures in polyslip
K. Aoki, X-G. Li and T. Masumoto	221	Differential thermal analysis of hydrogen-induced amorphization in C15 laves phase $GdFe_2$
H. Y. Liu and H. Jones	229	Solidification microstructure selection and characteristics in the zinc-based Zn–Mg system
P. F. Thomason	241	A model of dynamic fracture-toughness under conditions of nucleation-controlled ductile fracture
D. Ma and P. R. Sahm	251	Solidification behavior of superalloy IN 939 in melt spinning
L. X. Han, R. Warren and S. Suresh	259	An experimental study of toughening and degradation due to microcracking in a ceramic composite
S. P. Ringer, W. B. Li and K. E. Easterling	275	On the rotation of precipitate particles
S. Nourbakhsh, O. Sahin, W. H. Rhee and H. Margolin	285	Microstructural characterization of a zirconia-toughened alumina fiber reinforced niobium aluminide composite
J. W. Hutchinson, M. D. Thouless and E. G. Liniger	295	Growth and configurational stability of circular, buckling-driven film delaminations
R. Kirchheim	309	Stress and electromigration in Al-lines of integrated circuits

M. McCormack, A. G. Khachaturyan and J. W. Morris Jr — 325 A two-dimensional analysis of the evolution of coherent precipitates in elastic media

A. Coujou, A. Beneteau et N. Clément — 337 Observation *in situ* dans un MET du cisaillement d'un joint de macle cohérent $\Sigma 3$ par une micromacle de déformation

A. B. C. Dadson and R. D. Doherty — 345 Transmission Pseudo-Kossel (TK) studies of the structure of hot-deformed (dynamically recovered) polycrystalline aluminium

K. T. Venkateswara Rao, G. R. Odette and R. O. Ritchie — 353 On the contrasting role of ductile-phase reinforcements in the fracture toughness and fatigue-crack propagation behaviour of TiNb/γ-TiAl intermetallic matrix composites

V. Perovic, G. C. Weatherly, S. R. MacEwen and M. Leger — 363 The influence of prior deformation on hydride precipitation in Zircaloy

P. Schaaf, S. Wiesen and U. Gonser — 373 Mössbauer study of iron carbides: cementite $(Fe, M)_3C$ (M = Cr, Mn) with various manganese and chromium contents

H. Yasuda, T. Takasugi and M. Koiwa — 381 Elasticity of Ni-based $L1_2$-type intermetallic compounds

S. A. Mujahid and H. K. D. H. Bhadeshia — 389 Partitioning of carbon from supersaturated ferrite plates

Sun Ig Hong, Haruyuki Inui and C. Laird — 397 Latent hardening behavior of cyclically deformed Cu–16 at.% Al single crystals

Y. Sano, S. N. Chang, M. A. Meyers and S. Nemat-Nasser — 413 Identification of stress-induced nucleation sites for martensite in Fe–31.8 wt% Ni–0.02 wt% C alloy

NUMBER 3

K. Hono, A. Chiba, T. Sakurai and S. Hanada — 419 Determination of site occupation probability of Cu in Ni_3Al by atom-probe field ion microscopy

D. B. Marshall — 427 Analysis of fiber debonding and sliding experiments in brittle matrix composites

D. B. Marshall, M. C. Shaw and W. L. Morris — 443 Measurement of interfacial debonding and sliding resistance in fiber reinforced intermetallics

Wu-Yang Chu, A. W. Thompson and J. C. Williams — 455 Hydrogen solubility in a titanium aluminide alloy

K. K. Ray and G. Mandal — 463 Study of correlation between fractal dimension and impact energy in a high strength low alloy steel

P. S. Das, A. Biswas and B. K. Dhindaw	471	Modelling of eutectoid transformation in Zn–Al system
I. Roman and R. Aharonov	477	Mechanical interrogation of interfaces in monofilament model composites of continuous SiC fiber–aluminum matrix
M. H. Poech and H. F. Fischmeister	487	Deformation of two-phase materials: a model based on strain compatibility
Huang Yuan-Ti and Ho Ming-Ko	495	A study of preferred orientation of martensite and shape change during phase transformation in Cu–Al–Ni–Mn alloy
R. Stalmans, J. Van Humbeeck and L. Delaey	501	Thermomechanical cycling, two way memory and concomitant effects in Cu–Zn–Al alloys
A. V. Gorbunov	513	Parameters of melting dendrites in NaCl
G. Abbruzzese, I. Heckelmann and K. Lücke	519	Statistical theory of two-dimensional grain growth—I. The topological foundation
K. Lücke, I. Heckelmann and G. Abbruzzese	533	Statistical theory of two-dimensional grain growth—II. Kinetics of grain growth
O. Hunderi and N. Ryum	543	The interaction between spherical particles and triple lines and quadruple points
Re-Jehn Jahn and A. H. King	551	Dissociation of grain boundaries induced by changes of composition, the ejection of dislocations from grain boundaries, and the nucleation of diffusion induced grain boundary migration
N. Ohno, T. Mizuno, H. Kawaji and I. Okada	559	Multiaxial creep of a nickel-base directionally solidified alloy: anisotropy and simulation
S. Venkadesan, C. Phaniraj, P. V. Sivaprasad and P. Rodriguez	569	Activation energy for serrated flow in a 15Cr–15Ni Ti-modified austenitic stainless steel
R. M. Imayev, O. A. Kaibyshev and G. A. Salishchev	581	Mechanical behaviour of fine grained TiAl intermetallic compound—I. Superplasticity
R. M. Imayev, O. A. Kaibyshev and G. A. Salishchev	589	Mechanical behaviour of fine grained TiAl intermetallic compound—II. Ductile–brittle transition
Yu. M. Mishin and I. M. Razumovskii	597	Analysis of an asymmetrical model for boundary diffusion

NUMBER 4

Q. Jiang and H. Xu — 607 — Microobservation of stress induced martensitic transformation in CuAlNi single crystals

C. M. Kennefick and R. Raj — 615 — Creep fracture experiments with planar sapphire–copper interfaces stressed in tension

K. Sieradzki and J. S. Kim — 625 — Etch pitting and stress-corrosion cracking of copper

H. K. Kim, J. C. Earthman and E. J. Lavernia — 637 — Directional solidification of Ni_3Al

P. R. Rios — 649 — Abnormal growth in the presence of coarsening particles

B. Dutta, E. Valdes and C. M. Sellars — 653 — Mechanism and kinetics of strain induced precipitation of Nb(C, N) in austenite

K. K. Soni, D. B. Williams, J. M. Chabala, R. Levi-Setti and D. E. Newbury — 663 — Electron and ion microscopy studies of Fe-rich second-phase particles in Al–Li alloys

M. F. Bartholomeusz and J. A. Wert — 673 — Effect of dislocation dissociation on crack tip plasticity in $L1_2$ intermetallic alloys

Panping Zhu and R. W. Smith — 683 — Dynamic simulation of crystal growth by Monte Carlo method—I. Model description and kinetics

T. Kamijo, H. Adachihara, H. Fukutomi and E. Aernoudt — 693 — Development of cube texture in aluminum single crystals of a stable orientation

S. M. Collard and R. B. McLellan — 699 — High-temperature elastic constants of platinum single crystals

C. L. Fu and M. H. Yoo — 703 — Deformation behavior of B2 type aluminides: FeAl and NiAl

Z. Fang, B. R. Patterson and M. E. Turner — 713 — Influence of particle size distribution on coarsening

C. Nishimura and C. T. Liu — 723 — Environmental embrittlement in $L1_2$-ordered $(Co, Fe)_3V$ alloys

J. Miyake and M. E. Fine — 733 — Electrical conductivity versus strength in a precipitation hardened alloy

P. A. Duine, J. Sietsma and A. van den Beukel — 743 — Defect production and annihilation near equilibrium in amorphous $Pd_{40}Ni_{40}P_{20}$ investigated from viscosity data

G. W. Koebrugge, J. Sietsma and A. van den Beukel — 753 — Structural relaxation in amorphous $Pd_{40}Ni_{40}P_{20}$

G. Some, J. Bernardini and C. Lexcellent — 761 — Effective diffusion coefficient involved in the high temperature viscoplastic behavior law of Cu–Sn (15–20 at.% Sn)

T. Robert, M. E. Noguez, G. Salas and S. Montejano	771	Influence of grain refinement on some mechanical properties of non ferrous cast alloys
H. J. Frost, C. V. Thompson and D. T. Walton	779	Simulation of thin film grain structures—II. Abnormal grain growth
B. B. Straumal, O. I. Noskovich, V. N. Semenov, L. S. Shvindlerman, W. Gust and B. Predel	795	Premelting transition on 38°⟨100⟩ tilt grain boundaries in (Fe–10 at.% Si)–Zn alloys
S. Schänzer and E. Nembach	803	The critical resolved shear stress of γ'-strengthened nickel-based superalloys with γ'-volume fractions between 0.07 and 0.47
B. A. Greenberg, O. V. Antonova, L. E. Karkina, A. B. Notkin and M. V. Ponomarev	815	Dislocation transformation and the anomalies of deformation characteristics in TiAl—III. Temperature evolution of dislocation structure
B. A. Greenberg, O. V. Antonova, L. E. Karkina, A. B. Notkin and M. V. Ponomarev	823	Dislocation transformation and the anomalies of deformation characteristics in TiAl—IV. Observation of blocked dislocations
D. R. Haeffner and J. B. Cohen	831	The structure of G.P. zones in an Al–Cu–Zn alloy
Yu. M. Mishin and I. M. Razumovskii	839	A model for diffusion along a moving grain boundary
P. Gomiero, F. Livet, Y. Brechet and F. Louchet	847	Microstructure and mechanical properties of a 2091 AlLi alloy—I. Microstructure investigated by SAXS and TEM
P. Gomiero, Y. Brechet, F. Louchet, A. Tourabi and B. Wack	857	Microstructure and mechanical properties of a 2091 AlLi alloy—II. Mechanical properties: yield stress and work hardening
P. Gomiero, Y. Brechet, F. Louchet, A. Tourabi and B. Wack	863	Microstructure and mechanical properties of a 2091 AlLi alloy—III. Quantitative analysis of Portevin Le Chatelier instabilities and relation to toughness in Al–Li, Al–Cu–Mg and Al–Li–Cu–Mg (2091) alloys
P. R. Rios	873	On the relationship between time exponent and quasi stationary grain size distribution
R. A. Vandermeer and R. A. Masumura	877	The microstructural path of grain-boundary-nucleated phase transformations

I *Acta Metallurgica et Materialia*—Associate Editors

NUMBER 5

V. N. Perevezentsev, V. V. Rybin and V. N. Chuvil'deev — 887 — Overview No. 97: The theory of structural superplasticity—I. The physical nature of the superplasticity phenomenon

V. N. Perevezentsev, V. V. Rybin and V. N. Chuvil'deev — 895 — Overview No. 97: The theory of structural superplasticity—II. Accumulation of defects on the intergranular and interphase boundaries. Accommodation of the grain-boundary sliding. The upper bound of the superplastic strain rate

V. N. Perevezentsev, V. V. Rybin and V. N. Chuvil'deev — 907 — Overview No. 97: The theory of structural superplasticity—III. Boundary migration and grain growth

V. N. Perevezentsev, V. V. Rybin and V. N. Chuvil'deev — 915 — Overview No. 97: The theory of structural superplasticity—IV. Cavitation during superplastic deformation

C-D. Qin, N. A. James and B. Derby — 925 — Palladium–zirconia diffusion bonds: mechanical properties and interface reactions

B. Straumal, T. Muschik, W. Gust and B. Predel — 939 — The wetting transition in high and low energy grain boundaries in the Cu(In) system

F. C. Larché and J. W. Cahn — 947 — Phase changes in a thin plate with non-local self-stress effects

M. Wagner — 957 — Intrinsic instability of nanocrystalline metals

R. M. McMeeking and L. T. Kuhn — 961 — A diffusional creep law for powder compacts

D. Schneider, A. Krell, T. Weiss and Th. Reich — 971 — Investigation of creep in ($Al_2O_3 + ZrO_2$)-ceramics by ultrasonic surface waves

W. Krakow — 977 — A high resolution electron microscope study of a $\Sigma = 9/[110]$ 141.06° tilt boundary in Au

M. Carrard, M. Gremaud, M. Zimmermann and W. Kurz — 983 — About the banded structure in rapidly solidified dendritic and eutectic alloys

R. Schmelzle, B. Giakupian, T. Muschik, W. Gust and R. A. Fournelle — 997 — Diffusion induced grain boundary migration of symmetric and asymmetric $\langle 011 \rangle \{011\}$ tilt boundaries during the diffusion of Zn into Cu

K. S. Ravichandran — 1009 — The mechanics of toughness development in ductile phase reinforced brittle matrix composites

M. Sundararaman, W. Chen, R. P. Wahi, A. Wiedenmann, W. Wagner and W. Petry — 1023 — TEM and SANS investigation of age hardened Nimonic PE16 after cyclic loading at room temperature

R. G. Vardiman	1029	Microstructures in aluminum ion implanted with boron and heat treated
L. P. Kubin, Y. Estrin and C. Perrier	1037	On static strain ageing
K. Nogi, M. Tsujimoto, K. Ogino and N. Iwamoto	1045	Wettability of MgO single crystal by liquid pure Pb, Sn and Bi
S. R. Summerfelt and C. B. Carter	1051	Morphology of $NiFe_2O_4$ precipitation in NiO
O. Hunderi and N. Ryum	1069	A note on the stochastic theory of normal grain growth
P. H. Adler, G. B. Olson, M. F. Stevens and G. F. Gallegos	1073	On the constitutive relations for $\delta \rightarrow \alpha$ and $\alpha \rightarrow \delta$ martensitic transformation plasticity in plutonium alloys
H. Weiland	1083	The determination of long-range misorientations in the microstructure of materials
V. Srikanth and E. C. Subbarao	1091	Acoustic emission in ferroelectric lead titanate ceramics: origin and recombination of microcracks
J. Harase and R. Shimizu	1101	Coincidence grain boundary and (100)[011] secondary recrystallization in Fe–3% Si

M. Kogachi, S. Minamigawa and K. Nakahigashi	1113	Determination of long range order and vacancy content in the NiAl β'-phase alloys by X-ray diffractometry
Young-Won (Y-W.) Kim	1121	Microstructural evolution and mechanical properties of a forged gamma titanium aluminide alloy
L. K. Jain and R. C. Wetherhold	1135	Effect of fiber orientation on the fracture toughness of brittle matrix composites
D. P. Field and B. L. Adams	1145	Interface cavitation damage in polycrystalline copper
R. A. Vandermeer	1159	Microstructural path concept applied to normal grain growth
P. Kritsalis, V. Merlin, L. Coudurier and N. Eustathopoulos	1167	Effect of Cr on interfacial interaction and wetting mechanisms in Ni alloy/alumina systems
D. Ceccaldi, F. Yala-Sedrati, T. Baudin, R. Penelle et F. Royer	1177	Simulation de la texture de déformation en traction uniaxiale et calcul du coefficient de Lankford $R(\alpha)$ de tôles d'aciers extra doux—application au cas non orthotrope
C. S. Kim and J. M. Galligan	1187	The influence of viscosity on the escape rate from metastability—creep at low temperature

J. Rawers, J. Bennett, R. Doan and J. Siple	1195	Nitrogen solubility and nitride formation in Fe–Cr–Mn–Ni alloys
K. S. Kumar, S. K. Mannan and R. K. Viswanadham	1201	Fracture toughness of NiAl and NiAl-based composites
R. D. K. Misra and P. Rama Rao	1223	Grain boundary segregation in a low alloy steel under tensile loading conditions
F. Milstein and J. Marschall	1229	Structural bonding contributions and the elastic response of b.c.c. and f.c.c. crystals
J. P. Hirth and B. Carnahan	1237	Anisotropic elastic fields of twist boundaries
P. D. Warren, T. J. Mackin and A. G. Evans	1243	Design, analysis and application of an improved push-through test for the measurement of interface properties in composites
T. J. Mackin, P. D. Warren and A. G. Evans	1251	Effects of fiber roughness on interface sliding in composites
H. E. Dève, A. G. Evans and D. S. Shih	1259	A high-toughness γ-titanium aluminide
Jiang Xinggang, Cui Jianzhong and Ma Longxiang	1267	A fractal model for cavity damage and fracture of materials during superplastic deformation
Y. H. Pao and A. Gilat	1271	High strain rate deformation and failure of A533B steel at various temperatures
M. D. Thouless	1281	Mixed-mode fracture of a lubricated interface
M. D. Thouless, E. Olsson and A. Gupta	1287	Cracking of brittle films on elastic substrates
L. C. Brown	1293	A new examination of volume fraction effects during particle coarsening
K. Morii, J. Aoki and Y. Nakayama	1305	Fractal growth of Ga_6Mn phase in thin $Ga_{97}Mn_3$ amorphous films
E. Schumann, G. Schnotz, K. P. Trumble and M. Rühle	1311	Microstructural observations on the oxidation of γ'-Ni_3Al at low oxygen partial pressure
L. Müller, U. Glatzel and M. Feller-Kniepmeier	1321	Modelling thermal misfit stresses in nickel-base superalloys containing high volume fraction of γ' phase
D. R. Olander and U. M. El-Saied	1329	The effect of grain boundary motion on the kinetics of solute penetration into a polycrystalline medium
K. J. Handerhan and W. M. Garrison Jr	1337	A study of crack tip blunting and the influence of blunting behavior on the fracture toughness of ultra high strength steels

K. Ono and M. Meshii 1357 Hydrogen detrapping from grain boundaries and dislocations in high purity iron

H. Numakura, K. Hasegawa and M. Koiwa 1365 Pseudoelastic and anelastic effects due to the motion of twin boundaries in copper-based alloys

E. Sirois and H. K. Birnbaum 1377 Effects of hydrogen and carbon on thermally activated deformation in nickel

V. A. Khonik, A. T. Kosilov, V. A. Kuzmitschev and G. A. Dzuba 1387 Inelastic torsion and strain recovery of metallic glasses

Khin Yong Lam and Jin Min Zhang 1395 Transformation twinning in monoclinic zirconia particles

Ariel J. S. Traiber and Samuel M. Allen 1403 Ground state structures in ordered b.c.c. ternary alloys with second-neighbor interactions

F. Ebrahimi and J. R. Castillo-Gomez 1409 The effect of plastic deformation on fracture morphology of the sigma phase in the Nb–Ti–Al system

J. Wang, X. F. Wu, B. X. Liu and Z. Z. Fang 1417 Correlation of 3d transition metal carbide phase formation with 3d electrons by carbon ion implantation

H. Okada, T. Tamura, N. Ramakrishnan, S. N. Atluri and J. S. Epstein 1421 Analysis of toughening of magnesia partially stabilized zirconia, due to dilatational transformation

V. Yu. Gertsman, A. P. Zhilyaev, A. I. Pshenichnyuk and R. Z. Valiev 1433 Modelling of grain boundary misorientation spectrum in polycrystals with crystallographic texture

SUPPLEMENT

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON METAL–CERAMIC INTERFACES, JULY 1991

vii Preface

SECTION I: THEORY OF METAL–CERAMIC INTERFACES

U. Schönberger, O. K. Andersen and M. Methfessel — S1 — Bonding at metal–ceramic interfaces; *ab initio* density-functional calculations for Ti and Ag on MgO

D. M. Duffy, J. H. Harding and A. M. Stoneham — S11 — Atomistic modelling of the metal/oxide interface with image interactions

W. R. L. Lambrecht and B. Segall — S17 — Electronic structure of SiC–TiC interfaces

M. W. Finnis — S25 — Metal–ceramic cohesion and the image interaction

H. J. Fecht — S39 — Geometric aspects of low energy metal–ceramic interphase boundaries

SECTION II: FORMATION CHEMISTRY AND SEGREGATION OF INTERFACES

C. P. Flynn and S. Yadavalli — S45 — Growth of metal–ceramic interfaces by molecular beam epitaxy

B. Derby and C.-D. Qin — S53 — Metal–ceramic interfaces: sources and sinks for mass transfer

B. Gibbesch and G. Elssner	S59	Ultra high vacuum diffusion bonded Nb–Al_2O_3 and Cu–Al_2O_3 joints—the role of welding temperature and sputter cleaning
I. E. Reimanis	S67	Pore removal during diffusion bonding of Nb–Al_2O_3 interfaces
R. E. Loehman and A. P. Tomsia	S75	Reactions of Ti and Zr with AlN and Al_2O_3
T. Wagner, R. Kirchheim and M. Rühle	S85	Electrochemically-induced reactions at Ni/ZrO_2 interfaces
M. Backhaus-Ricoult	S95	Solid state reactions between silicon carbide and (Fe, Ni, Cr)-alloys: reaction paths, kinetics and morphology
K. P. Trumble	S105	Thermodynamic analysis of aluminate formation at Fe/Al_2O_3 and Cu/Al_2O_3 interfaces
E. Heikinheimo, A. Kodentsov, J. A. van Beek, J. T. Klomp and F. J. J. van Loo	S111	Reactions in the systems Mo–Si_3N_4 and Ni–Si_3N_4
I. Gotman and E. Y. Gutmanas	S121	Microstructure and thermal stability of coated Si_3N_4 and SiC
T. Suga, Y. Takahashi, H. Takagi, B. Gibbesch and G. Elssner	S133	Structure of Al–Al and Al–Si_3N_4 interfaces bonded at room temperature by means of the surface activation method
J. Th. M. De Hosson, X. B. Zhou and M. Van Den Burg	S139	Metal–ceramic interfaces in laser coated steels: a transmission electron microscopy study of a mixture of iron and spinel grains

SECTION III: ADVANCED TECHNIQUES FOR STUDYING METAL–CERAMIC INTERFACES

C. H. Lee and K. S. Liang	S143	X-ray studies of misfit dislocations in the interface of epitaxial Nb films on sapphire
S. J. Pennycook and D. E. Jesson	S149	Atomic resolution *Z*-contrast imaging of interfaces
D. A. Bonnell, I. Solomon, G. S. Rohrer and C. Warner	S161	Direct measurement of local properties of interfaces with scanning tunneling microscopy
S. J. Rozeveld, J. M. Howe and S. Schmauder	S173	Measurement of residual strain in an Al–SiC_w composite using convergent-beam electron diffraction

SECTION IV: STRUCTURAL DEFECTS

A. C. Daykin, C. J. Kiely and R. C. Pond	S195	Defects in Ni and Co silicide: Si interfaces

W. Mader and D. Knauss	S207	Equilibrium position of misfit dislocations at planar interfaces
J. Mayer, G. Gutekunst, G. Möbus, J. Dura, C. P. Flynn and M. Rühle	S217	Structure and defects of MBE grown Nb–Al_2O_3 interfaces
A. Trampert, F. Ernst, C. P. Flynn, H. F. Fischmeister and M. Rühle	S227	High resolution transmission electron microscopy studies of the Ag/MgO interface
D. X. Li, P. Pirouz, A. H. Heuer, S. Yadavalli and C. P. Flynn	S237	The characterization of Nb–Al_2O_3 and Nb–MgO interfaces in MBE grown Nb–MgO–Nb–Al_2O_3 multilayers
K. L. Merkle, M. I. Buckett and Y. Gao	S249	Atomic structure of heterophase interfaces
P. Lu and F. Cosandey	S259	Dislocation structures at Cu–MgO and Pd–MgO interfaces
M. Backhaus-Ricoult and S. Hagège	S267	Metal–ceramic interfaces in internally reduced (Mg, Cu)O
N. Tanaka, F. Yoshizaki, K. Katzuda and K. Mihama	S275	Interface structures of γ-iron crystallites embedded in magnesium oxide crystalline films
M. Van Den Burg and J. Th. M. De Hosson	S281	Al–SiC interface structure studied by HREM
Y. Ishida, J. Wang and T. Suga	S289	Designing structural defects to relieve thermal stress

SECTION V: MECHANICAL PROPERTIES

A. G. Evans and B. J. Dalgleish	S295	The fracture resistance of metal–ceramic interfaces
J. L. Bassani, V. Vitek and I. Alber	S307	Atomic-level elastic properties of interfaces and their relation to continua
G. E. Beltz and J. R. Rice	S321	Dislocation nucleation at metal–ceramic interfaces
